

Ozan Keysan

Curriculum Vitae

December 2015

Address: Orta Doğu Teknik Üniversitesi
Elektrik-Elektronik Müh., 06800, Ankara
Phone: +90 312 210 23 19
Email: keysan@metu.edu.tr
Web: <http://ozan.keysan.me>

Experience

2014–Present	Assistant Professor	Middle East Technical University
2011–2014	Research Associate	Institute for Energy Systems, University of Edinburgh
2010–2012	Electrical Machine Design Consultant	NGenTec, Edinburgh
2009–2010	Research Associate	Institute for Energy Systems, University of Edinburgh
2005–2009	Research Assistant	Middle East Technical University

Education & Qualifications

2013	PhD	Electrical Engineering, University of Edinburgh, UK <i>Thesis Title: Superconducting Generators for Large Offshore Wind Turbines</i>
2008	MSc	Electrical-Electronics Engineering, Middle East Technical University <i>Thesis Title: A Non-Invasive Speed and Position Sensor for Induction Machines Using External Search Coils</i>
2005	BSc	Electrical-Electronics Engineering, Middle East Technical University

Research Interests

My main area of interests are power generation, renewable energy and design of electrical machines. In particular, I am working on novel electrical machine topologies such as superconducting machines and permanent-magnet machines. I also worked on the implementation of direct-drive systems to renewable energy systems such as wind, wave and tidal energy converters.

Research Experience & Projects

2014	NAREC	Design of next generation HVDC network for the offshore renewable energy industry. My role in the project is to design a high-frequency high-power transformer that can be coupled to the HVDC transmission line.
2011–2014	EU FP7 Project	Marina Platform Project is an EU FP7 project with 17 industrial and academic partners. I am working as a full-time researcher in the project, which aims to design combined wave and wind energy platforms. I've led the work package in the University of Edinburgh, the aim of which is to compare different generator topologies and power take-off systems in terms of efficiency and reliability.
2013	United Arab Emirates Uni.	Design of a 5 kW permanent-magnet linear generator test rig.
2013	General Electric	A project to validate the superconducting generator topology that I developed during my PhD. General Electric agreed to loan the superconducting coil, vacuum chamber and other test equipments for the cryogenic experiments.
2011	NGenTec	Design consultant for a medium-speed generator design. Electromagnetic optimization a 5 MW, 300 rpm permanent-magnet generator has been completed.

2010	NGenTec	Design and optimization of a 1 MW, 12 rpm direct-drive generator for a wind turbine. The machine has been manufactured and successfully tested.
2010	SMART R&D Grant	Design and testing of a 25 kW axial flux permanent-magnet generator. The experimental results have been used to evaluate the thermal performance of the generator and the cooling system.
2010	Hayward Tyler	Feasibility analysis of a submerged and flooded permanent-magnet generator. Thermal performance of the flooded generator has been investigated as well as the corrosion mechanisms and fluid drag losses.
2009–2010	NPower Project	The feasibility analysis of direct-drive PM generators for two wave energy converters (Aquamarine, AWS Ocean Power) and two tidal energy converters (Marine Current Turbines, Scotrenewables) have been investigated. An analytical and optimization tool is developed, and licensed by University of Edinburgh for further use.
2005–2008	METU	A novel method to estimate the rotor speed and position of an induction motor using the fringing flux out of the rotor cage is developed. An international patent has been awarded to this work.

Teaching Experience

School of Engineering, University of Edinburgh

Laboratory Supervision:

- Power Engineering Lab (2nd year): This course introduces students to the techniques and equipment used in the generation, transmission, distribution and utilisation of electrical power.
- Power Generation Lab (3rd year): The lab aims to give the students experience in working with rotating machines and power electronic equipment and synchronization to the grid.

Courses:

- The Industrial Doctoral Centre for Offshore Renewable Energy (four-year EngD programme), "Introduction to Superconductivity and Superconducting Generators".

Supervision:

- Mario Recio Lara, "Development of a mobile phone application to detect speed and faults of electrical machines", MSc Thesis, 2013.
- Marzia Akbari, "Comparison and control of power take-off systems for combined wind/wave energy platforms", MSc Thesis, 2013.

Middle East Technical University

Laboratory Supervision

- Electromechanical Energy Conversion I-II (EE361, EE362).
- Static Power Conversion (EE463).
- Laboratory coordinator (4 semesters).

Honours & Awards

- 2013 Staff Scholarship, University of Edinburgh.
- 2012 Young Researcher Support, International Conference on Superconductivity and Magnetism, ICSM.
- 2012-2013 PhD Overseas Fee Waiver and Stipend, University of Edinburgh.
- 2011 Young Researcher Award and Travel Grant, European Conference on Applied Superconductivity, EUCAS.
- 2011 IEEE Membership and Travel Grant, IEEE Power Electronics Society.
- 2011 Best Poster Award, IEEE International Electric Machines and Drives Conference, IEMDC.
- 2010 Best Paper Award, IEEE International Conference on Electrical Machines, ICEM.
- 2010-2012 PhD Scholarship on Renewable Energy, Hopewell Holdings, Hong Kong.
- 2005–2007 TUBITAK Graduate Fellowship.
- 2005 Ranked 2nd in the Academic Personnel and Graduate Education Exam (ALES).
- 2005 Finalist in the METU Entrepreneurship Competition (Yeni İşler Yeni Fikirler).
- 2001–2005 Dean's high honour list (3 times), Dean's honour list (3 times).

Courses & Seminars

- Future Reliable Renewable Energy Conversion Systems, 4th Flagship Seminar, Chongqing, China, 2012.
- Supervising Postgraduate Research, Iain Davidson, 2013.
- Large-Scale Parallel Computing, University of Edinburgh, 2013.
- Superconducting Machines, UK Magnetics Society, University of Oxford, 2012.
- Thermal and Mechanical Aspects of High Performance Electrical Machines, UK Magnetics Society, 2011.
- LaTeX for scientific publications, Skills Development Edinburgh, 2010.
- Opera 2D/3D FEA Analysis of Electrical Machines, Cobham Ltd. Vector Fields, 2009.
- Marine and Tidal Energy Workshop, Industrial Problems in Marine Energy Workshop, 2009.
- Project Management for Researchers, Fistrat Training & Consultancy Ltd., 2009.
- Project Presentation on International Venture Capital Forum, Athens, 2006.
- Project Management and Entrepreneurship Course, 30 days, METU Technopolis, 2005.

Memberships

- 2011–Present IEEE Member
- 2011–Present IEEE Power and Energy Society Member
- 2010–Present UK Magnetics Society Member
- 2005–Present TMMOB Electrical Engineers Society Member

Academic Work

Associate Editor, IET Renewable Power Generation.

- Reviews for IEEE Transactions of Industrial Electronics
- IEEE Transactions of Industrial Informatics
- IET Renewable Power Generation Journal
- IEEE International Conference on Electrical Machines and Drives
- IET Power Electronics, Machines and Drives Conference
- IEEE International Conference on Electrical Machines

Software

- Programming: Python, R, Matlab, C++.
- Finite Element Analysis: Opera, FEMM, ANSYS, Gmsh, GetDP.
- Computer Aided Design: SolidWorks, AutoCad.
- Computational Fluid Dynamics: OpenFOAM.

Activities & Hobbies

Mountaineering Active Member of METU Mountaineering Club
 Sailing Dinghy and Yacht Sailing, Certificate of Competence For Operators of Pleasure Craft.
 Blogging asuyatuyolar.org

Languages

English (Fluent), Spanish (Intermediate), Chinese (Beginner)
